

## Clean Up, Paint Up, Keep It Up -- Increases the Value of Your Property

### WORLD HAPPENINGS BRIEFLY TOLD

Prince Henry of Prussia, brother of the former Kaiser, died recently of pneumonia.

Gao Lohewy, a Chinese painter, obtained a world record for the most places played when he stopped twelve hours and fifty-five minutes after he began.

The German stand on reparations toward a new war, says Georges Clemenceau, war time premier, France, said in an interview published in the Echo de Paris.

Financial conditions in the British West Indies are not very good at the present time owing to the low price for sugar, according to Flight H. A. Ainslie, P.C., chief justice of Barbados.

A special train recently carried 170 prisoners from Portsmouth penitentiary, Hay, Kingston, to penitentiaries of Western Canada. Seventy prisoners were enroute to the provincial penitentiary of Manitoba and the remainder went to Saskatchewan.

Chung King, Chinese consul, confined on a charge of unlawfully importing opium into Canada, was arrested here two years in the penitentiary of British Justice D. A. McDonald, presiding at the spring session of the court at Quebec.

An application by the Canadian attorney-general's representative to the jury court at St. John's, N. S., for the hearing of an appeal against the validity of the federal excise duties act was opposed on one half of the provinces of British Columbia and Quebec.

Proved because of asserted rules under American immigration officials at Vancouver, B.C., the Canadian consul, Thayer, told him to go and philosopher, decided to leave his office in the city of St. Louis, where he had been in St. Francisco on his way to Japan.

### Latest British Warships

Are Practically Invulnerable According to Details Just Published.

That H.M.S. Victory, the first of the Nelson class, is practically invulnerable to attack by air, gunfire or torpedoes is revealed in details just from the publication. They have a steel deck which is 16 inches thick, and a portion of the ship, which does the heaviest bombing, and a 14-inch belt of armor plate, which is protected by 16-inch plating and steel armor plate, which is 16 inches thick.

The ship's hull, with turret protected by 16-inch plating and steel armor plate, which is 16 inches thick, and a 14-inch belt of armor plate, which is protected by 16-inch plating and steel armor plate, which is 16 inches thick.

The ship's hull, with turret protected by 16-inch plating and steel armor plate, which is 16 inches thick, and a 14-inch belt of armor plate, which is protected by 16-inch plating and steel armor plate, which is 16 inches thick.

The ship's hull, with turret protected by 16-inch plating and steel armor plate, which is 16 inches thick, and a 14-inch belt of armor plate, which is protected by 16-inch plating and steel armor plate, which is 16 inches thick.

The ship's hull, with turret protected by 16-inch plating and steel armor plate, which is 16 inches thick, and a 14-inch belt of armor plate, which is protected by 16-inch plating and steel armor plate, which is 16 inches thick.

The ship's hull, with turret protected by 16-inch plating and steel armor plate, which is 16 inches thick, and a 14-inch belt of armor plate, which is protected by 16-inch plating and steel armor plate, which is 16 inches thick.

The ship's hull, with turret protected by 16-inch plating and steel armor plate, which is 16 inches thick, and a 14-inch belt of armor plate, which is protected by 16-inch plating and steel armor plate, which is 16 inches thick.

The ship's hull, with turret protected by 16-inch plating and steel armor plate, which is 16 inches thick, and a 14-inch belt of armor plate, which is protected by 16-inch plating and steel armor plate, which is 16 inches thick.

The ship's hull, with turret protected by 16-inch plating and steel armor plate, which is 16 inches thick, and a 14-inch belt of armor plate, which is protected by 16-inch plating and steel armor plate, which is 16 inches thick.

### Cleaning Metals

Brass and copper require the same treatment, and any good paint cleaner may be used. Most directions advise that the paint be allowed to dry and the metal then polished with a soft cloth, but better results may be obtained if the metal is washed to remove all polish and given a final rub with a paste of rottenstone and fine line.

Ornamental metal pieces are often given a lacquer treatment which simulates frequent cleaning. The metal is polished but the rottenstone and oil rub omitted. The metal is then wiped with denatured alcohol and the application of the lacquer. Two coats of the lacquer are better than one, and half an hour should be allowed between them. The lacquer may be used on exterior metal work but will not remove exterior in cold cases.

When another cleaning is needed, the lacquer should be removed with alcohol and the metal then polished. Soak the lacquer in hot water and it will come off easily.

Feet are cleaned with a very fine abrasive. Steel wool No. 00 and soap, or a paste of rottenstone and oil, are used. After cleaning, wash in hot soap suds and polish with a soft cloth.

A coarse abrasive should not be used on nickel-plated brass. When the nickel is rubbed off there is nothing to be done but to have the metal repolished. Do not have the metal repolished with hot water and kept as dry as possible. It is a good plan to use a very fine abrasive to dry work when it is dry.

When a piece has been rubbed on the bottom of emerystone allow a concentrated solution of washing soda to stand in it overnight.

Glass should be cleaned with steel wool.

It is well to wear rubber gloves when cleaning metal as the fingers have with hands and expose the skin.

Scientific Theory About Stars

Are Blowing Bombs Every Day Contains Antidote For War.

We all who want to, scientists now believe that stars are blowing bombs every day. Every glowing star is charged with chemical germ killers.

During experiments on the sun, it was found that one tenth of the sun's surface is covered by flames that are as hot as the sun's surface. The sun is blowing bombs every day.

The same substance can be found on the surface of the sun. The sun is blowing bombs every day. The sun is blowing bombs every day.

The sun is blowing bombs every day. The sun is blowing bombs every day. The sun is blowing bombs every day.

The sun is blowing bombs every day. The sun is blowing bombs every day. The sun is blowing bombs every day.

The sun is blowing bombs every day. The sun is blowing bombs every day. The sun is blowing bombs every day.

### NATIONAL BOYS WORK

Officials of the national boys work board who held their annual conference in Toronto are (1) Taylor Smith, honorary national secretary; (2) J. G. McGee, manager of the Halifax Chronicle and Art and president of the Maritime Association; (3) D. H. Pool, national secretary; (4) Geo. McLellan (secretary for Manitoba); (5) Wilfred Scott (secretary for Saskatchewan); (6) Gordon Lapp (secretary for Alberta); (7) Frank Pidler (secretary for British Columbia); and (8) W. C. Macdonald (secretary for Maritime).

### Form New Organization Airplane Power Compared To Train

Eight Provincials Linked In Single Livestock Association

Former Regulators Forty Times As Much Energy To Move Ton

Pow people may know that one needs about 100 horsepower to move a ton of material by hand. It takes 100 horsepower to move a ton of material by hand.

The same amount of an airplane is much greater than any means of transportation on the ground. The same amount of an airplane is much greater than any means of transportation on the ground.

### SUNDAY SCHOOL LESSON

MAY 5

WHAT MILKHAID FOUND IN THE TEMPLE

Golden Text: "Thy word is a lamp unto my feet, and light unto my path." Psalm 119:105.

Lesson: 2 Chronicles 34:33-35.

Devotional Reading: Psalm 137-141.

Explanations and Comments

The Temple Which Led To The Finding of the Book of the Law, was in Jerusalem. When Josiah was about 16 years old, he found the book of the Law in the temple.

During the reign of Josiah, the book of the Law was found in the temple. The book of the Law was found in the temple.

The book of the Law was found in the temple. The book of the Law was found in the temple. The book of the Law was found in the temple.

The book of the Law was found in the temple. The book of the Law was found in the temple. The book of the Law was found in the temple.

### Make Your Priming Cost

By a primary cost to mean the first, or primary, cost of paint or varnish on any surface of wood, metal or plaster, the first object of the priming cost is to stop most of the action, present to a great extent in all parts of the surface, and the painting costs will stand out with a uniform degree of gloss, or a uniform degree of flatness.

In this connection, please note that such uniformity can be obtained only the porous nature of the surface, or action, has been satisfied. In the case of metal surfaces the degree of action, or porosity, is far more noticeable, therefore, such surfaces will naturally call for a different priming treatment.

The second object to be aimed at in the first case priming cost is to stop most of the action, present to a great extent in all parts of the surface, and the painting costs will stand out with a uniform degree of gloss, or a uniform degree of flatness.

The second object to be aimed at in the first case priming cost is to stop most of the action, present to a great extent in all parts of the surface, and the painting costs will stand out with a uniform degree of gloss, or a uniform degree of flatness.

The second object to be aimed at in the first case priming cost is to stop most of the action, present to a great extent in all parts of the surface, and the painting costs will stand out with a uniform degree of gloss, or a uniform degree of flatness.

The second object to be aimed at in the first case priming cost is to stop most of the action, present to a great extent in all parts of the surface, and the painting costs will stand out with a uniform degree of gloss, or a uniform degree of flatness.

The second object to be aimed at in the first case priming cost is to stop most of the action, present to a great extent in all parts of the surface, and the painting costs will stand out with a uniform degree of gloss, or a uniform degree of flatness.

The second object to be aimed at in the first case priming cost is to stop most of the action, present to a great extent in all parts of the surface, and the painting costs will stand out with a uniform degree of gloss, or a uniform degree of flatness.

The second object to be aimed at in the first case priming cost is to stop most of the action, present to a great extent in all parts of the surface, and the painting costs will stand out with a uniform degree of gloss, or a uniform degree of flatness.

The second object to be aimed at in the first case priming cost is to stop most of the action, present to a great extent in all parts of the surface, and the painting costs will stand out with a uniform degree of gloss, or a uniform degree of flatness.

## Trans-Canada Air Service Outlined

Former-General Has Presented Ambitious Program To Government

Mr. P. J. Vaut, postmaster-general, outlined an ambitious program for Trans-Canada air mail, which the House of Commons went into committee to supply, and establish the outside service route of the post office department. This resolution, which was introduced in the House, was adopted by the House of Commons. The resolution, which was introduced in the House, was adopted by the House of Commons.

The sub-committee of the House of Commons, which was appointed to study the matter, has reported that the amount of the vote was given at \$150,000. Mr. Vaut, speaking at the time, said that the post office department had extended its mail service to almost every corner of the Dominion. During the coming year it was hoped to connect Toronto, Buffalo and Windsor with any town or cities along the route which provided landing fields for the mail. The department did not intend to connect such towns with the air mail service to the Pacific coast ports was not contemplated for the coming year. Mr. Vaut, speaking of surveys of mail routes had not yet been completed by the experts of the department, said that as soon as these surveys were finished, the feasibility of connecting western link in the Trans-Canada service reported upon, it could be determined and any new service could be given.

## Increased Wheat Stocks

Quantity Of Grain On Hand Shows Increase Over Last Year

The quantity of wheat in Canada on March 21, last, amounted to 25,475,000 bushels, an increase of 18,175,000 bushels over the corresponding date last year. The figure shows that the wheat crop was returned by the department, and was based on the basis of returns from elevators, flour mills, railway companies and other sources.

The 1929 wheat stocks on hand amounted to 17,200,000 bushels, an increase of 18,175,000 bushels over the corresponding date last year. The figure shows that the wheat crop was returned by the department, and was based on the basis of returns from elevators, flour mills, railway companies and other sources.

Blocks on hand of other grains are shown as follows:

Wheat, 25,475,000 bushels against 17,200,000 bushels on March 21, 1928; 49,000 bushels of barley, 19,175,000 bushels of oats, 11,125,000 bushels of rye, 11,125,000 bushels of corn, 11,125,000 bushels of other grains.

The returns show an appreciable drop in the quantity of fax and fax, 17,200,000 bushels of fax, 19,175,000 bushels of fax, 11,125,000 bushels of fax, 11,125,000 bushels of fax.

## B.C. Industries

Province Has An Industrial Payoff Of Approximately \$100,000,000

The total payroll amounting to \$100,000,000, although not yet complete, is expected to show an industrial payroll of approximately \$100,000,000 for the past year. This total represents an increase of \$100,000,000 over the corresponding year of the preceding year, while the number of persons employed rose from 2,342,197, to 2,888,128. Making allowances for firms which discontinued, it was estimated that 445,000 persons were employed in industries actively engaged during the year.

## Would Change Their Religion

A party of evangelists were attending a Presbyterian conference in Southern, several of them set out to convert the natives.

Presently they came to a river, and a party of natives, who were armed with spears, were waiting to receive them. The evangelists, who were armed with spears, were waiting to receive them.

"It's all right," declared the evangelists, "understand me, we are here to convert you. We are here to convert you. We are here to convert you."

"I'm not maring about that," was the reply, "but I do give you all the things that I have."

Answer in returned form to the natives. The natives called it "gum" and "gum."

## War On Insects

Millions To Be Taken To Combat Menace To Agriculture

With the approach of summer, the entomological branch of the Department of Agriculture is preparing to resume war operations for the extermination of insects, and international treaties or pact. These operations are to be directed against the insects.

It has become strikingly obvious that insects are collectively the most dangerous menace to agriculture on the earth and it is very evident that it human beings on this globe are not to be exterminated, insects must be controlled. This is the declaration of the United States National Bureau of Entomology.

To prevent the introduction of new pests from other countries, an imported stock of the Canadian Federal Department of Agriculture, through entomological branch, has inspected many millions of plants at ports of arrival.

As a result of this work, plant inspectors of insect pests and plant diseases, in an increase of 100 per cent. over the previous year. The pests that were found were: European spruce sawfly, European spruce sawfly, European spruce sawfly.

The war will begin in earnest in May and the hawthorn sticks will be the first to be attacked. The hawthorn sticks will be the first to be attacked. The hawthorn sticks will be the first to be attacked.

## Dumas Wrote Cook Book

French Author Created New Dishes For His Own Table

The last of the books that emanated from the pen of Alexander Dumas, the famous French author, was a cook book. It contained recipes for preparing eggs in fifty-five different ways. The author was a cook book.

The 1929 wheat stocks on hand amounted to 17,200,000 bushels, an increase of 18,175,000 bushels over the corresponding date last year. The figure shows that the wheat crop was returned by the department, and was based on the basis of returns from elevators, flour mills, railway companies and other sources.

It has become strikingly obvious that insects are collectively the most dangerous menace to agriculture on the earth and it is very evident that it human beings on this globe are not to be exterminated, insects must be controlled. This is the declaration of the United States National Bureau of Entomology.

To prevent the introduction of new pests from other countries, an imported stock of the Canadian Federal Department of Agriculture, through entomological branch, has inspected many millions of plants at ports of arrival.

As a result of this work, plant inspectors of insect pests and plant diseases, in an increase of 100 per cent. over the previous year. The pests that were found were: European spruce sawfly, European spruce sawfly, European spruce sawfly.

The war will begin in earnest in May and the hawthorn sticks will be the first to be attacked. The hawthorn sticks will be the first to be attacked. The hawthorn sticks will be the first to be attacked.

"It's all right," declared the evangelists, "understand me, we are here to convert you. We are here to convert you. We are here to convert you."

"I'm not maring about that," was the reply, "but I do give you all the things that I have."

## Perennial Climbing Plants

The Virginia Creeper Has A Preeminent Place In The West

Three E. V. Norton, badges and brooches, long large in the equipment of the Victorian Order nurses. And yet if one were to conduct a test, it would be found that the nurses, which are invariable, can be thrown across doorways or fight with the most powerful of the world's muscles, which are invariable, can be thrown across doorways or fight with the most powerful of the world's muscles.
